Professional Summary

I build reliable software across backend systems, full-stack products, deployment pipelines, and cloud environments. My work includes application development, engineering automation, infrastructure support, performance improvement, and practical delivery across business and product-focused teams.

Backend Engineering | Full-Stack Development | DevOps & CI/CD | Cloud Infrastructure | Automation | Game Development

Experience

Lead Application Developer
Okakichi Sdn. Bhd.
Oct 2025 – March 2026

- Led a team of 8 engineers, driving client-side development and ensuring seamless integration with backend systems.
- Resolved full-stack issues to maintain stable cross-platform builds for Android and iOS.
- Coordinated feature delivery across frontend and backend, contributing to gameplay systems and product improvements.
- Managed deployment pipelines and improved automation workflows using Jenkins.

Full-Stack Developer
Okakichi Sdn. Bhd.
Apr 2025 – Oct 2025

- Developed and maintained full-stack features for cross-platform mobile applications.
- Diagnosed and resolved system issues, improving stability and reducing build failures.
- Implemented gameplay features and client-side mechanics.
- Supported deployment and automation workflows using Jenkins.

Full-Stack Developer
Ricrym
Dec 2024 – Feb 2025

- Developed and maintained full-stack features for cross-platform mobile applications.
- Diagnosed and resolved system issues, improving stability and reducing build failures.
- Implemented gameplay features and client-side mechanics.
- Supported deployment and automation workflows using Jenkins.

Software Engineer
Verisense Health
Jul 2023 – Jul 2024

- Implemented authentication systems including SSO and session management.
- Refactored backend and frontend architecture to improve maintainability.
- Developed encryption and decryption workflows for secure data handling.
- Supported deployment processes and integrated Discourse platform.

Education

Bachelor in Software Engineering
Universiti Malaysia Terengganu (UMT)
2017 – 2020

Diploma in Mechanical Engineering
Politeknik Sultan Mizan Zainal Abidin (PSMZA)
2013 – 2015

Core Skills

CORE COMPETENCIES

Backend Engineering | DevOps & CI/CD | System Design | Full-Stack Development | Automation & Scripting | Game Systems Development

PROGRAMMING LANGUAGES

C# | Python | JavaScript | TypeScript | Go | Java | Rust (Basic)

BACKEND & API DEVELOPMENT

RESTful API Design | Authentication (OAuth, SSO)

- Supported deployment processes and integrated Discourse platform.

Software Engineer
Jun 2021 – Jul 2023

Shimmer Sensing

- Maintained AWS infrastructure to ensure system stability and availability.
- Managed CI/CD pipelines using Jenkins for continuous delivery.
- Developed and supported full-stack features with focus on reliability.
- Collaborated across teams to support deployment and operational workflows.

Technical Analyst
Jul 2020 – Feb 2021

Blue Vinegar

- Developed and customized ERP solutions using Odoo.
- Implemented modules and workflows to improve business processes.
- Translated business requirements into system-level solutions.

Freelance Software Developer
Feb 2021 – Apr 2025

Self-Employed

- Delivered full-stack and automation solutions for various client projects.
- Built backend services, frontend interfaces, and system integrations.
- Developed automation scripts to improve workflow efficiency.
- Translated business needs into technical implementations.
